PreteenVaxScene Back to School Showcase
Summer is known as the unofficial “vaccination season,” the period of the year when school-age children are receiving the vaccines they need before they start school in the fall. This webinar will feature upcoming summer and back-to-school HPV vaccination campaigns and resources to help health care professionals take advantage of the back-to-school timeframe to boost their HPV vaccination rates.

Wednesday, June 27, 2018
1:00 – 2:00 pm, ET
Registration link online (www.immunizedelaware.org/for-professionals/continuing-education-events)

CDC Pink Book Webinars
Register now for the online webinars by the CDC, providing an overview of the principles of vaccination, general recommendations, immunization strategies for providers, and specific information about vaccine-preventable diseases and the vaccines that prevent them. Each one-hour webinar explores a chapter from the 13th edition of “Epidemiology and Prevention of Vaccine-Preventable Diseases,” also known widely as “The Pink Book.” Continuing education will be available for each event. All events begin at noon, ET, and are on Wednesdays. The first is on June 6.

Register here: https://www.cdc.gov/vaccines/ed/webinar-epv/

Webinar: Hepatitis B Clinical Training
This four-week live webinar training offers one CME/CNE/CEU credit per webinar, free! All sessions are from 4:30 – 5:30 pm, ET.
Register and find out more by emailing megchappell@empireliverfoundation.org.

- New Event
  - Zambia – Cholera. On June 15, the Zambian Ministry of Health officially declared the end of the cholera outbreak that began in October 2017.

- Ongoing Events
  - DRC – Ebola Virus Disease (52 cases, 28 deaths, CFR 53.9%). The outbreak remains active. The outbreak remains localized to three health zones: Iboko (27 (52%) confirmed and probable cases), Bikoro (21 cases (40%)), and Wangata (4 (8%)). Since May 17, no new confirmed EVD cases have been reported in Bikoro and Wangata health zones. To date, 24 patients with confirmed EVD have been cured.
  - Kenya – Rift Valley Fever (54 cases, 11 deaths, CFR 20.4%). Three counties have been affected (Wajir, Marsabit, and Siaya). The most affected age group is 21 – 30 years old, and men make up 70% of the cases.
  - NE Nigeria – Cholera (1,412 cases, 25 deaths, CFR 1.8%). The outbreak is continuing and the daily incidence rate is steadily increasing in the past few days. In week 25, a total of 99 new cases and one death were reported.
  - Uganda – Cholera (92 cases, 1 death, CFR 1.1%). The capital city of Kampala has been experiencing an insidious outbreak since the end of April. Seven new suspected cases were reported on June 20.

- Humanitarian Crisis
  - Central African Republic. Continued insecurity due to armed insurgents continues. There are movements of armed groups, leading to tense situations throughout the country. Malaria, acute respiratory infections, AWD, and injury are main causes of morbidity and mortality.
