Adult Immunization 2019 Update: Improve your Practice and Resident Education

WHO Afro Outbreaks & Emergencies

Week 39: September 23 - 29, 2019

- New Events
- Ongoing Events
  - **DRC – Ebola Virus Disease** (3,188 cases, 2,129 deaths, CFR 67%). Experts are continuing to see persistent transmission:
    - 21 new confirmed cases have been reported this week
    - 14 deaths this week
    - 161 health workers have been affected (5%)
    - 29 health zones affected with at least one case
    - 13 health zones with confirmed cases in the last 21 days
    - 14 health zones: ongoing contact tracing
  - **Nigeria – Measles** (54,902 cases, 275 deaths, CFR 0.5%). The incidence has continued to rise since the beginning of 2019 (over 2,000 per week) and a National Measles Emergency Operations Center was activated in March. Multiple vaccination campaigns have been conducted to contain the spread, in addition to the deployment of several rapid response teams.
  - **Humanitarian Crisis**
    - **Cameroon.** The crisis affects the Far North North-west, and South-west regions of the country, is due to attacks and criminal activity, and has led to significant population displacement, increased Nigerian refugees, and increased risk of disease outbreaks. The first round of cholera vaccination is having an effect with a decrease in transmission in all areas
that received the vaccine. Other outbreaks include malaria, typhoid fever, influenza, monkeypox, and measles.

- 10/03: DRC – Ebola Virus Disease

**CDC Current Outbreak List** ([https://www.cdc.gov/outbreaks/index.html](https://www.cdc.gov/outbreaks/index.html))
- Pulmonary Disease associated with E-cigarette (August 2019)
- *Listeria monocytogenes* outbreaks, 13 states (August 2019)

**Travel Notices**
- October
  - Dengue: Asia and the Pacific Islands
